

AP Physics 1 Summer Assignment

C. Raziano

You will explore and review using virtual labs the concepts of speed and velocity, distance time and velocity time graphs and vectors. We will go over these virtual labs during the first few days of school with actual lab work – this is to prepare you for those activities.

You will log into Explore Learning (Gizmos) and will use the code 8N8RDP5T4D to join AP Physics 1. The first three lessons on the class list go with the attached handouts. You are to use the Gizmo simulation to do experiments and answer questions on these handouts.

All handouts are due completed when school starts. 5 Bonus Points will be given to students who turn them in the first day of class. The 2nd day of class will result in no penalty or bonus. The 3rd day of class will start late point penalties.
